CAREER OBJECTIVE:

As a dedicated and enthusiastic fresher, I am seeking a challenging position in a growth-oriented organization where I can apply my skills and quickly contribute to ongoing projects. I am available for immediate joining and eager to learn and grow professionally.

SKILLS

- Programming: Java, JavaScript, Python
 - Front-End: HTML, CSS, React.js, Next.js
 - Back-End: Node.js, Express.js, PHP
 - Database: MySQL, MongoDB
 - Tools: Git, Figma, Adobe XD, Excel and Canva
 - Frameworks: Tailwind CSS, Bootstrap
-

INTERNSHIP

Full-Stack Developer

Pofi Technologies Private Limited | June 2023 - July 2023

Built a scalable CRUD web application using Django with models, views, and templates. Integrated role-based authentication to secure user access. Designed a responsive, user-friendly interface and optimized database queries with Django ORM.

Web Developer

Indie Spirit Technologies | August 2022 - August 2022

Gained practical experience building responsive web apps using JavaScript. Contributed to a Library Management System with modern UI/UX design. Collaborated with teams to create intuitive, interactive user interfaces.

PROJECT

License Plate Detection using GAN (AI) | [Link](#)

Tech Stack: Python, YOLO, OpenCV, GANs, EASY OCR

- Detected license plates using YOLOv8 and extracted plate regions with OpenCV.
- Enhanced low-quality plates using GANs to improve clarity and recognition.
- Used EASY OCR to accurately read characters from the processed license plates.

Ecommerce Website (AI) | [Link](#)

Tech Stack: MongoDB, Express.js, React.js, Node.js, JWT, REST API, Vercel

- Built a full-featured MERN stack e-commerce app with product listings, cart, and secure checkout.
- Implemented JWT authentication and role-based access control for users and admins.
- Developed REST APIs with Node.js/Express.js, integrated MongoDB, and deployed on Vercel.

Expense Tracker App (MERN Stack) | [Link](#)

Tech Stack: MongoDB, Express.js, React.js, Node.js, JWT, REST API, Vercel, Recharts

- Built a MERN stack finance tracker with JWT authentication and user-specific transaction access.
- Implemented income and expense transaction management with add/delete functionality.
- Created RESTful APIs with Express.js and MongoDB; deployed on Vercel with continuous integration.

Booking Appointment (Next.js) | [Link](#)

Tech Stack: Next.js, MongoDB, Axios

- Built a fast, responsive doctor appointment app using Next.js, MongoDB, and Axios.
- Implemented real-time booking, rescheduling, and cancellation with dynamic routing and APIs.
- Designed a mobile-friendly, intuitive UI for smooth user experience across all devices.

MovieHub (React.js)| [Link](#)

Tech Stack: HTML5, CSS3, React.js, React Router, Axios, OMDB API

- Developed a dynamic web application to discover movies, TV shows, anime, and web series using OMDB API.
- Integrated real-time data fetching with Axios and implemented search functionality with React Router.
- Linked IMDb pages for detailed information, ensuring smooth and intuitive navigation across devices.

Recipe Finder (React.js)| [Link](#)

Tech Stack: HTML5, CSS3, JavaScript, TheMealDB API

- Built a responsive web app that allows users to search recipes by ingredients, cuisine, and meal type.
- Fetched real-time data from TheMealDB API to display recipe details including images, ingredients, and instructions.
- Ensured full mobile responsiveness and quick page load times for better UX across devices.

Plant Website - UI/UX Design | [Link](#)

Tool Used: Figma

- Designed a modern, single-page website with a nature-inspired theme for a plant-based business.
- Created an intuitive layout with smooth navigation and a clean visual hierarchy.
- Ensured full mobile responsiveness and cross-device compatibility to maximize user accessibility.
- Applied user-centered design principles to enhance visual appeal and engagement.

E-Commerce Website - Responsive UI/UX Design | [Link](#)

Tool Used: Figma

- Designed a fully responsive e-commerce website using a mobile-first approach for optimal experience across all devices.
- Created an intuitive layout with fluid navigation and visually appealing UI elements.
- Focused on accessibility and user engagement, improving usability and supporting higher conversion rates.
- Applied modern design principles to ensure consistency, clarity, and brand alignment.

Sales Data Analysis | [Link](#)

Tool Used: SQL querying, Excel Pivot Tables, Data Visualization

- Extracted sales transaction data using SQL queries from a sample database.
- Cleaned and organized raw data in Excel (handled missing values, duplicates).
- Built a dynamic dashboard in Excel showing monthly sales trends, regional sales performance, and top-selling products.

PROFICIENT

Bachelor of Computer Science and Engineering

AAA College of Engineering and Technology

2021-2025

CERTIFICATIONS

Web Development - Internshala

Full Stack Development - Devtown

Web Development Bootcamp - CodeKara

Introduction to Career Skills in Data Analytics - LinkedIn

Introduction of Excel - Simplilearn

ACHIEVEMENTS

2nd Prize – Website Development Competition at AAA College Inauguration

2nd Prize – “Code Bugs” Programming Contest
